List of Contents

NUMBER 1

Katharina Kohse-Höinghaus, David F. Davidson, Albert Y. Chang, and **Ronald K. Hanson**	1	Quantitative NH_2 concentration determination in shock tube laser-absorption experiments
S. Zhang, J. Z. Qiu, and **G. Wang**	19	Influence of the $3d^2\,^3P_0$ and $3d^2\,^3P_2$ valence states on the Stark spectrum of the Rydberg state of Ca
J. Zangers and **D. Meiners**	25	Investigation of the continuum emission of argon plasmas
A. L. Crosbie and **S. M. Shieh**	33	A double-integral formulation of Ambarzumian's method for isotropic scattering in a two-dimensional, semi-infinite medium
Y. Guimeráns, E. J. Iglesias, D. Mandelbaum, and **A. Sánchez**	39	Stark broadening measurement of the line 2058.13 nm of neutral helium in a linear discharge
D. Hofsaess	45	Theoretical term energies and oscillator strengths for nitrogen and oxygen
Note		
M. Cattani	83	The two-level approximation for ammonia self-broadening
Software Survey Section	I	

NUMBER 2

K. Kamiuto, M. Sato, and **M. Iwamoto**	85	Experimental determination of the radiative properties of a large diffuse sphere
R. D. Taylor and **A. W. Ali**	91	Collisional–radiative ionization and recombination coefficients for higher ionization stages of atomic nitrogen
A. Postan and **Y. Ben-Aryeh**	105	The effect of viscosity on phase conjugation by four-wave mixing in fluids
Vivek Bakshi and **R. J. Kearney**	111	New tables of the Voigt function
S. T. Thynell	117	The integral form of the equation of transfer in finite, two-dimensional, cylindrical media
R. Friedman and **A. Dalgarno**	137	The magnetic dipole photodissociation cross section of molecular oxygen
J. P. Bouanich, C. Brodbeck, P. Drossart, and **E. Lellouch**	141	Collision-induced absorption for H_2–H_2 and H_2–He interactions at 5 μm

J. M. Francés, J. Zúñiga, F. G. Mateo, and A. Requena 149 Analytical perturbation treatment of vibrational stretch–bend couplings

N. Barakat, M. Medhat, and Z. El Gohary 157 Correlation between theoretical and experimental atomic absorption data for sodium spectral lines

Note

J. B. Bhartiya and S. H. Behere 163 Anharmonicity constants of diatomic molecules for extended Rydberg and Dimitreva–Zenevich potential functions

Corrigendum 167

Software Survey Section I

NUMBER 3

P. L. Roney 169 A temperature-dependent regular infrared band model

J. R. Tsai, M. N. Özişik, and F. Santarelli 187 Radiation in spherical symmetry with anisotropic scattering and variable properties

Kenneth Fox and Donald E. Jennings 201 Spectral shifts of methane lines in collisions with hydrogen, helium, nitrogen, and argon

A. Y. Chang and R. K. Hanson 207 Measurements of absorption lineshapes in the $A^3\Pi_i \leftarrow X^3\Sigma^-$ (0, 0) band of NH in the presence of Ar broadening

T. T. Charalampopoulos and D. W. Hahn 219 Extinction efficiencies of elongated soot particles

Tae-Kuk Kim and HaeOk Skarda Lee 225 Radiative transfer in two-dimensional anisotropic scattering media with collimated incidence

A. L. Crosbie and L. C. Lee 239 Multidimensional radiative transfer: a single integral representation of anisotropic scattering kernels

Manuel A. González, Víctor R. González, and Santiago Mar 247 Precise measurement of the Balmer-alpha core

Software Survey Section I

NUMBER 4

M. L. Adams, E. W. Larsen, and G. C. Pomraning 253 Benchmark results for particle transport in a binary Markov statistical medium

D. F. Davidson, A. Y. Chang, K. Kohse-Höinghaus, and R. K. Hanson 267 High temperature absorption coefficients of O_2, NH_3, and H_2O for broadband ArF excimer laser radiation

G. C. Pomraning 279 Statistics, renewal theory, and particle transport

L. J. Ryan, L. A. Rayburn, and **A. J. Cunningham**	295	Measurements of oscillator strengths for EUV emissions of ionized oxygen, nitrogen and sulfur
N. J. McCormick	303	Estimation of two similarity parameters from polarized radiation measurements within a medium
M. Y. Perrin and **J. M. Hartmann**	311	Temperature-dependent measurements and modeling of absorption by CO_2–N_2 mixtures in the far line-wings of the 4.3 μm CO_2 band
J. P. Bouanich, G. Blanquet, and **J. Walrand**	319	Diode laser measurements of He-broadened linewidths in the ν_1 band of OCS
M. Ruffert, G. Himmel, M. Osterhold, and **H. Schlüter**	327	Redistribution of radiation by the fluctuating ion microfield
Software Survey Section	I	

NUMBER 5

J. Z. Klose and **W. L. Wiese**	337	Branching ratio technique for vacuum UV radiance calibrations: extensions and a comprehensive data set
Shinobu Miyachi, Keiji Sawada, Kiyoto Takahata, Hidetoshi Suemitsu, Takashi Fujimoto, Rei Okasaka, Keishi Ishii, Yosuke Hirata, Masayuki Fukao, Hitoshi Tanaka, Takashi Maekawa, Yasushi Terumichi, and **Shigetoshi Takaka**	355	Radial distribution of ion temperature in a WT-III tokamak plasma, as determined from Abel inversion of impurity line profiles
Isao Hirano	359	Saturated absorption spectra of the Cs-D_2 line
Anthony J. Dean and **Ronald K. Hanson**	375	Development of a laser absorption diagnostic for shock tube studies of CH
R. D. M. Garcia and **C. E. Siewert**	385	On discrete spectrum calculations in radiative transfer
Gajendra K. Johri and **Shashi K. Pathak**	395	Theoretical study of microwave spectral linewidth of ethylene oxide perturbed by nitrogen and carbon dioxide
Schachar Nadler and **D. E. Jennings**	399	Foreign-gas pressure broadening parameters of propane near 748 cm^{-1}
Vivek Bakshi and **Robert J. Kearney**	405	Measurement of Stark width of some Ar I transitions in a d.c. argon plasma jet at atmospheric pressure
Kouichi Kamiuto	415	The diffraction-scattering subtraction method for radiative transfer in a highly anisotropic scattering medium exposed to collimated radiation
G. Baldacchini, A. Bizzarri, L. Nencini, G. Buffa, and **O. Tarrini**	423	New measurements of self broadening and shift of ammonia lines
S. Djeniže, M. Malešević, A. Srećković, M. Milosavljević, and **J. Purić**	429	Stark broadening and shift of singly-ionized argon spectral lines in higher multiplets
Software Survey Section	I	

NUMBER 6

M. Weber, W. E. Blass, and **Jean-Luc Salanave**	437	Tunable diode-laser measurements of the 14 μm line strengths in C_2H_2
T. D. McLean, B. B. Ratcliff, J. Z. Pastalan, and **K. K. Innes**	445	The binding energies of three iodine complexes
M. Y. Perrin and **J. M. Hartmann**	459	High temperature absorption of the 3.39 μm He–Ne laser line by methane
Michael E. Thomas and **Milton J. Linevsky**	465	Integrated intensities of N_2, CO_2, and SF_6 vibrational bands from 1800 to 5000 cm^{-1} as a function of density and temperature
K. Kamiuto, M. Sato, and **M. Iwamoto**	477	Determination of the radiative properties of high-porosity materials by use of the emerging-intensity fitting method
A. I. Shestakov and **D. C. Eder**	483	Escape probabilities in a cylindrically expanding medium
Robert J. Cattolica, Thomas G. Mataga, and **John A. Cavolowsky**	499	Electronic quenching and vibrational relaxation of NO $A^2\Sigma(v' = 1$ and $v' = 0)$ by collisions with H_2O
J. Boissoles, C. Boulet, L. Bonamy, and **D. Robert**	509	Calculation of absorption in the microwindows of the 4.3 μm CO_2 band from an ECS scaling analysis
L. Larrabee Strow and **Liu Zheng**	521	A modified equivalent-width technique for diode-laser line strength measurements
Ya-Qiu	529	The radiative transfer equation for strongly-fluctuating, continuous random media
Richard Goody, Robert West, Luke Chen and **David Crisp**	539	The correlated-k method for radiation calculations in nonhomogeneous atmospheres
D. M. O'Brien	551	A lower bound for the solution of the radiative transfer equation in finite clouds
J. C. Han, Masako Suto, and **L. C. Lee**	557	Fluorescence from photoexcitation of C_2H_5OH by vacuum ultraviolet radiation
W. A. Lahoz	563	An exact linearization and decoupling of the integral equations satisfied by Chandrasekhar's X- and Y-functions
Gustavo García and **José Campos**	567	Transition probabilities for triplet levels of Ba(I)
J. Halenka, B. Vujičić, and **S. Djurović**	571	Shift of the peaks of the H_β spectral line
D. A. Sadovskii and **B. I. Zhilinskii**	575	Contact transformations in tensor formalism. Effective Hamiltonian and dipole moment for the ν_2, ν_4 dyad of tetrahedral molecules
J. Migdalek and **M. Stanek**	585	Relativistic MCDF oscillator strengths for the $4s^2\,{}^1S_0$–$4s4p\ {}^3P_1$, $^1P_1$ transitions in zinc isoelectronic sequence

A. Gleizes, M. Razafinimanana, M. Sabsabi, and **S. Vacquié** 593 Experimental study of F^+ ion recombination continuum in SF_6 arc plasmas

Carlos B. Suárez and **Daniela Bertuccelli** 599 Intensities in the 43-v'' fluorescence series of I_2

J. Cernohorsky, L. J. van den Horn, and **J. Cooperstein** 603 Maximum entropy Eddington factors in flux-limited neutrino diffusion

A. L. Marshak 615 The effect of the hot spot on the transport equation in plant canopies

Sunanda K., Sheila Gopal, B. J. Shetty, and **G. Lakshminarayana** 631 Franck–Condon factors and r-centroids for the $E^1\Sigma^+$–$X^1\Sigma^+$ bands of SiS and SiSe

M. Kh. Salakhov 635 An algorithm for the differentiation of arbitrary order in the solution of inversion problems in applied spectroscopy

L. Yang, Y.-J. Zhao, and **Z.-J. Zhang** 645 The effect of autoionizing states of particles on the properties of laser-produced plasmas

Note

Lawrence G. Piper 649 Comments on "Discharge Emissions from NaN_3 Related to the HgBr Laser" by V. Kushawaha and A. Michael [*JQSRT* **41,** 1 (1989)]
